for twelve or fewer segments (300 kHz total bandwidth) or an AM station licensed for eight or fewer segments (200 kHz total bandwidth) may lease excess capacity for broadcast and other uses on a primary basis.

(2) An applicant (new or modification of existing license) may assume the cost of replacement of one or more existing licensees equipment with narrowband equipment of comparable capabilities and quality in order to make available spectrum for its facilities. Existing licensees must accept such replacement without cost to them except upon a showing that the replacement equipment does not meet the capability or quality requirements.

(c) [Reserved]

3. Section 74.602 is amended by revising the introductory text of paragraph (a) to read as follows:

§ 74.602 Frequency assignment.

(a) The following frequencies are available to broadcast licensees for assignment to television pickup, television STL, and television relay stations. The bands 1990-2110 and 6875-7125 MHz are divided into 250 ld-z segments. (The segment frequencies are from 1990.125 to 2109.875 MHz and from 6875.125 to 7124.875 MHz.) The segments may be combined to form a channel of appropriate bandwidth necessary to transmit television signals, but not exceeding that listed in the table below. The channel will be assigned by its center frequency, channel bandwidth, and emission designator. It is recommended that channels be assigned according to the table below, provided that such channel bandwidths not exceed requirements. The bands 17,700-18,580 and 19,260-19,700 MHz are available as described in paragraph (i) below. Additionally, the band 38.6-40.0 GHz is available for assignment without channel bandwidth limitations to TV pickup stations on a secondary basis to fixed stations.

[Docket Nos. 50720-5154 and 50834-5167]

Groundfish of the Gulf of Alaska and Groundfish of the Bering Sea and Aleutian Islands Area; Corrections

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rules; correction.

SUMMARY: This document corrects the catcher/processor and mothership reporting regulations that were established by Amendment 14 to the Fishery Management Plan for Groundfish of the Gulf of Alaska, published October 24, 1985, 50 FR 43193, and by Amendment 9 to the Fishery Management Plan for the Groundfish of the Bering Sea and Aleutian Islands Area, published November 6, 1985, 50 FR 46072.

James E. Douglas, Jr., Deputy Assistant Administrator for Fisheries, National Marine Fisheries Service.

PART 672—[AMENDED]

§ 672.5 [Corrected]

In FR Doc. 85-25143, published October 24, 1985, § 672.5(a)(3)(i), page 43201, column 1, the fourth word from the end of the first sentence, “area” is corrected to read “position.”

PART 675—[AMENDED]

§ 675.5 [Corrected]

In FR Doc. 85-26534, published November 6, 1985, § 675.5(a)(3)(i), page 46075, column 3, the fourth word from the end of the first sentence, “area” is corrected to read “position.”

The corrected sentence for both rules now reads:

Twenty-four hours before starting and upon stopping fishing or receiving Groundfish in any area, the operator of that vessel must notify the Regional Director of the date and hour in GMT and the position of such activity.
