¹ Steller sea lion conservation area established at § 679.22(a)(11)(iv).
² SCA limitations for vessels less than or equal to 99 ft LOA that are not participating in a cooperative will be established on an inseason basis in accordance with § 679.22(a)(11)(iv)(D)(2) which specifies that "the Regional Administrator will prohibit directed fishing for pollock by vessels catching pollock for processing by the inshore component greater than 99 ft (30.2 m) LOA before reaching the inshore SCA harvest limit during the A, B and D seasons to accommodate fishing by vessels less than or equal to 99 ft (30.2 m) inside the SCA for the duration of the inshore seasonal opening."

The first emergency interim rule (65 FR 380, January 5, 2000) establishes procedures for AFA inshore catcher vessel pollock cooperatives to apply for and receive cooperative fishing permits and inshore pollock allocations. NMFS received applications from seven inshore catcher vessel cooperatives by the application deadline of December 31, 1999. Table 2 makes final 2000 Bering Sea subarea allocations to the seven inshore catcher vessel pollock cooperatives that have been approved and permitted by NMFS for the 2000 fishing year. Final allocations for cooperatives and vessels not participating in cooperatives are not made for the Aleutian Islands subarea because the Aleutian Islands subarea has been closed to directed fishing for pollock under the emergency interim rule to implement Steller sea lion protection measures (65 FR 3892, January 25, 2000; 65 FR 36795, June 12, 2000).

¹ Under § 679.61(e)(1) the individual catch history for each vessel is equal to the vessel's best 2 of 3 years inshore pollock landings from 1995 through 1997 and includes landings to catcherprocessors for vessels that made 500 or more mt of landings to catcherprocessors from 1995 through 1997.
